### **DETAILED ACTION**

1. Claims 29-62 are pending in the instant application. Claims 32 and 33 have been amended, claims 15, 17 and 19 have been canceled and claims 35-62 have been added as requested by Applicant in the Paper filed January 20, 2004.

#### ***Objection to Specification and Sequence Compliance***

2. The objection to the specification is withdrawn in view of Applicants' amendment, and the insertion of the sequence identifier in the legend to Fig. 1 is acknowledged.

#### ***Withdrawn Objections and Rejections***

3. Any objection or rejection of record which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

#### ***New Objections and Rejections***

4. Claims 41-44 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claims don't further limit the subject matter of the previous claims, since the previous claims recite a "bovine" TNF-R1.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 46-59 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 46-59 encompass nucleotides or polypeptides that are no less than the lengths recited in the claims, and these recited lengths are not present in the specification. On page 6, line 22, a fragment of 536 nucleotides is presented (nucleotides 378-923) and on page 5, line 21, a fragment of 543 nucleotides is recited. On page 6, lines 22-23, a fragment of 78 nucleotides is presented (nucleotides 924-1001). However, the fragment sizes recited in the claims are not present in the specification, and therefore is new matter.

***Conclusion***

- 6.1 Claims 29-40 and 59-62 are allowed.
- 6.2 Claims 41-44 are objected to.
- 6.3 Claims 45-58 are rejected.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
